

0.75 mmscfd 1100 psig Refrige Plant

Listing ID:
IH-585

Published

General Info

Year Built:
2009

Service Type:
Sweet

PASC Condition Rating:
B

Skidded:
No

Housed:
Yes

Connection Status:
Disconnected

Warranty:
No

Refridge Info

Capacity:
0.75 mmscfd

Manufacturer:
GTG Energy Systems

Pressure:
1100 psig

Flash Tank:
No

Driver Info

Driver Types:
Electric

Driver Make:
WEG

Driver Model:
256T TEFC-XP

Max HP:
20 hp

Rated RPM:
1775 RPM

Compressor Details

Compressor Make:
Carrier

Compressor Model:
5F60-A219

Compressor Serial #:
3409UA7439

Building / Skid Info

Building Heated:
No

Notes:
This is a fuel gas refrige plant. The operator said he never saw it run but heard it was good for 20 decs. The sour gas used to go through the Sulfatreat to scrub it sweet, then went into this refrige plant. Cooler is from R&R Engineering, m/n: H54.9. It is electronically controlled but there is no markings

on the outside of the panel to indicate who built it. Options include AC lit Cata-dyne heaters, exhaust fan, fire eye, gas detection, gas sampling station (dewpoint?), AC lighting, & Canalta 2" dual chamber meter run. Electric Driver Details: 20HP 460/60/3 256T TEFC-XP 1755RPM
